7 WAYS TO INCORPORATE *fall inspired* DETAILS INTO YOUR WEDDING DAY

The natural beauty autumn offers makes for gorgeous fall weddings, and often allows you to create a space that is both comforting, and elegant. Our favorite ladies over at Love Detailed have taught us that one way of bring the season into your special day is by playing up the colors of the turning leaves; we love deep wine reds, warm ambers and natural greens – they make for a rustic, yet luxurious feel. And of course, never forget to pull inspiration from your surroundings! From a charming dessert display to a countrified cocktail bar, here are 7 ways to incorporate fall details into your wedding day.

1 COLORED BOUQUETS

Make a statement and opt for a bold bouquet. Fall's landscape is generally not as lush and green, so make sure you contrast your backdrop with a colorful bouquet. We recommend using seasonal florals and sticking to your wedding color palette.

2 LOOSE FLORALS

There is something about this style that is just so right for fall. We love how the casual look of loose florals plays up what is naturally happening around us during this time of the year – leaves are changing colors and falling, and there is something so special about incorporating the change in season into a fall tablescape.

SEASONAL INSPIRED COCKTAILS

Nothing kick starts the holiday season quite like food and drinks! Your signature cocktails should not only look like fall, but tastes like it as well. Sage is one of our go-to garnishes for this time of year.

4 INCORPORATE FRUITS & VEGGIES

Fall is a time for harvesting and appreciating nature. Fruit and/or veggies look so beautiful on any tablescape – try using them on your place setting in lieu of a napkin ring.

FALL-ESQUE DESSERTS

Play up your color scheme and incorporate treats that are seasonal too. Use natural elements as risers, like the wood slabs to play up your fall inspired theme.

JEWELLED TONES

Amber pressed glass, bronze flatware, and gold accents help create a cozy and inviting feel. We picked marsala to add a wow-factor to this palette; use these jeweled tones in unexpected places such as the bride's floral crown.
